Against — None

On — Emmanuel Garcia, Texas Center for Education Policy
- BACKGROUND:** According to the Intercultural Development Research Association, Texas schools fail to graduate about 35 percent of their high school students. This creates enormous costs for the students themselves and for society as a whole. Students who do not complete high school are ill equipped for employment in the modern workforce, and 75 percent of inmates in America’s state prisons did not complete high school.

Education Code, sec. 29.081 contains a definition of a “student at risk of dropping out of school.” This applies to students under age 21 who meet a number of criteria, including failure to advance to the next grade level for one or more school years, poor grades and unsatisfactory scores on assessment tests, evidence of serious disciplinary problems, limited English proficiency, pregnancy and/or parenthood, and other factors.

DIGEST:

HB 3418 would add Education Code, sec. 29.095 to require the commissioner of education to administer a pilot program to provide grants to school districts to fund student club activities for students at risk of dropping out of school.

The commissioner could award a grant of \$5,000 or less per district per school year on behalf of a student club at a high school campus at which at least 60 percent of students were identified as students at risk for dropping out of school. A grant could be awarded to more than one student club at a campus in the same academic year. The cost of the program could not exceed \$5 million in any state fiscal biennium.

The commissioner would establish application criteria for receipt of a grant under the program, including:

- a description of the student club;
- a statement of the student club's goals, intent and activities;
- a statement of the source of funds to be used to match the grant;
- a budget for the student club and a statement showing that the club's finances were sustainable; and
- any other information required by the commissioner.

A grant awarded under the program would have to be matched by an equal amount of other state, federal, or local funds, including donations from local businesses and community organizations. To be eligible for a grant, the student club and the club's sponsor would have to be sanctioned by the campus and district.

A student club could use grant funds to support academic or co-curricular club activities, other than athletics, in which at least 50 percent of the participating students were drop-out risks. Funds could be used for materials, sponsor stipends, and other needs that directly support the club's activities. No more than 50 percent of a grant could be used to pay sponsor stipends.

The commissioner would establish a grant agreement to be signed by the sponsor of a student club receiving a grant and another authorized school district officer. It would require the district and club to participate in an evaluation, as determined by the commissioner, of the club's program and the program's effect on student achievement and dropout rates. At the end of the school year, a student club that received a grant would be required

to submit a report to the school district board of trustees summarizing the club's activities and the extent to which it met its goals.

The bill would take place September 1, 2007.

NOTES:

According to the Legislative Budget Board, HB 3418 would cost \$5.5 million in general revenue-related funds in fiscal 2008-09. Approximately \$383,000 above the cost of funding the grants would pay for three FTEs at the Texas Education Agency, and the program evaluation would cost an estimated \$150,000 in fiscal 2009.

The companion bill, SB 1515 by West, has been referred to the Senate Education Committee.
