DIGEST

Currently, regulations allow the Department of Human Services (DHS) to license Medicaid beds that are committed to the care of patients with Alzheimer's and are affiliated with a medical school operated by the state, are engaged in research, and that separate patients according to the stage of the disease and the functional level of the patient. However, there are no provisions that allow for care of traditional nursing home patients under similar circumstances. This bill would authorize DHS to exempt a nursing facility from the procedures established under this section if the facility meets certain qualifications, in order to allow the portion of the traditional nursing beds to be designated as Medicaid to adequately and fairly treat all segments of the geriatric population.

PURPOSE

As proposed, H.B. 3693 sets forth certification under the state Medicaid program of nursing home beds in certain nursing facilities.

RULEMAKING AUTHORITY

This bill does not grant any additional rulemaking authority to a state officer, institution, or agency.

SECTION BY SECTION ANALYSIS

SECTION 1. Amends Section 32.0213, Human Resources Code, by adding Subsection (c), to authorize the Department of Human Services to exempt a nursing facility for the procedures established under this section if the facility is affiliated with a state-supported medical school, located on land owned or controlled by the school, and serves as a teaching facility for physicians and related health care professionals.

SECTION 2. Emergency clause.
Effective date: upon passage.
