### **DIGEST**

Currently, the open records law allows a legislator to obtain one copy of any public information without charge. The Texas Legislative Council (council) conducts investigations, studies, and gathers and disseminates information for the legislature. The council also maintains databases of statistical and demographic information to obtain and correlate information for legislative policy analysis and development. S.B. 1367 would authorize legislative agencies and committees to cooperate with the council in providing information to the extent permitted by state and federal law, and would entitle the council to obtain appraisal records in electronic form from appraisal districts.

### **PURPOSE**

As proposed, S.B. 1367 authorizes legislative agencies and committees access to the same information.

### **RULEMAKING AUTHORITY**

This bill does not grant any additional rulemaking authority to a state officer, institution, or agency.
