AUTHOR'S / SPONSOR'S STATEMENT OF INTENT

As of January 2009, more than 98,000 Americans, including 8,000 Texans, await life-saving organ transplants. The vast majority of organs available for transplant in the United States come from deceased donors, or anatomical donors. Each deceased donor may give as many as seven solid organs for transplantation in addition to eyes and numerous tissues. Anatomical gifts may be made for the purposes of transplantation, therapy, research, or education.

In 2006, after three years of active participation among numerous entities in an effort to create uniformity among state laws regarding organ donation, the National Conference of Commissioners on Uniform State Law constructed the Revised Uniform Anatomical Gift Act (2006 UAGA) to facilitate organ donation. The 2006 UAGA, which addresses only the recovery of certain parts from deceased donors, strengthens the language expressly barring a person from "making, amending, or revoking" an anatomical gift if the donor granted donation of certain parts. The 2006 UAGA advocates expansion of the list of individuals who are authorized to make an anatomical gift on a donor's behalf, both during and after the donor's life, and provides for making an anatomical gift on a donor registry in addition to donor cards and driver's licenses.

H.B. 2027 relates to adoption of the 2006 UAGA and provides criminal penalties.

RULEMAKING AUTHORITY

This bill does not expressly grant any additional rulemaking authority to a state officer, institution, or agency.

(d) Provides that except as otherwise provided in Section 692A.008(h), in the absence of an express, contrary indication by the individual set forth in the refusal, an individual's unrevoked refusal to make an anatomical gift of the individual's body or part bars all other persons from making an anatomical gift of the individual's body or part.

(e) Provides that in the absence of an express, contrary indication by the donor or other person authorized to make an anatomical gift under Section 692A.004, an anatomical gift of a part is neither a refusal to give another part nor a limitation on the making of an anatomical gift of another part at a later time by the donor or another person.

(f) Provides that in the absence of an express, contrary indication by the donor or other person authorized to make an anatomical gift under Section 692A.004, an anatomical gift of a part for one or more of the purposes set forth in Section 692A.004 is not a limitation on the making of an anatomical gift of the part for any of the other purposes by the donor or any other person under Section 692A.005 or Section 692A.010.
