AUTHOR'S / SPONSOR'S STATEMENT OF INTENT

Secondhand smoke is a known cause of lung cancer, heart disease, low birth weight, and chronic lung ailments such as bronchitis and asthma, among other health problems, and studies have found that it leads to the deaths of 53,000 Americans each year. Twenty-four states have adopted smoke-free laws and an additional eight are considering becoming smoke-free.

C.S.S.B. 544 amends current law relating to the elimination of smoking in certain workplaces and public places, and provides penalties.
