AUTHOR'S / SPONSOR'S STATEMENT OF INTENT

The Skills Development Fund is a grant program administered by the Texas Workforce Commission (TWC). It funds job training programs performed by public community or technical colleges to fill specific workforce training needs. Programs are initiated through application to TWC by a company or consortium in partnership with the Texas A&M Engineering Extension Service or a public community or technical college.

Under current law, Skills Development Fund recipients are required to conduct a biennial program review and issue a report to TWC on their use of grant funds received. The report requires recipient entities to detail the effectiveness of "the program in improving the wages of participants" and "identify strategies...to more effectively impact economic development." Reporting entities results are utilized by TWC in formulation of its statutorily required report to the governor and legislature.

Despite a statutory requirement that all receiving entities furnish such a report, some have failed to do so. To better ensure compliance with the reporting requirement, S.B. 634 requires that an entity not in compliance return unexpended grant funds and renders it ineligible for subsequent funding until the required report is furnished.

S.B. 634 amends current law relating to reporting requirements for certain skills development fund workforce training program providers.
