The library has just released an [interactive Texas state budget timeline](#). Using information from the drafting of the 2012-2013 biennial budget, this comprehensive guide presents a month-by-month overview of the budget process. The timeline begins in May 2010 with the Legislative Budget Board's instructions for agency appropriations requests and ends in December 2011 with the state comptroller's Annual Cash Report. Budget bills and related documents are mentioned within the timeline and are linked as they are released. The library will update the timeline when the 2013-2014 budget process gets underway, so be sure to check back.
