You can find almost anything in Google, but have you ever wondered if you're searching in the most efficient way? If so, take a look at some of the tips and shortcuts explained in the links below. Google can do amazing things in one click, like find population and unemployment rates, define any word or phrase, or even help you track the status of arriving or departing U.S. flights. It also has the capacity to handle precise word searching, allowing you to narrow your search results and save time. For learning these tips and tricks, we liked the three websites below, however additional information can be found by visiting Google's [Inside Search Features](#) page.

**Google Search Features:** Learn about the different types of information you can find in one click, as well as more advanced search techniques like searching on the synonym of your search term, or using the plus (+) operator.

**Weather**  
 To see the weather for many U.S. and worldwide cities, type "weather" followed by the city and state, U.S. zip code, or city and country.  
 Example:

**Stock Quotes**  
 To see current market data for a given company or fund, type the ticker symbol into the search box. On the results page, you can click the link to see more data from Google Finance.  
 Example:

**Time**  
 To see the time in many cities around the world, type in "time" and the name of the city.  
 Example:

**Sports Scores**  
 To see scores and schedules for sports teams type the team name or league name into the search box. This is enabled for many leagues including the National Basketball Association, National Football League, National Hockey League, and Major League Baseball.  
 All sports data provided by STATS LLC
