By Jerry Thompson

Traces his military and political career with the Republic of Mexico, the Republic of Texas, and finally in the State of Texas, where he became the highest ranking Tejano in the confederate army and later a member of the Texas Legislature. Describes his devotion to the Texas border (as the only Tejano in the Texas Legislature in 1879) and his

tireless work to raise the economic and political status of the region. Concludes that with his unique status as a friend and confidant of two Mexican presidents, and his influence in the Texas Legislature, he was one of the single most influential individuals in the history of the border.

### 3. A Colony in a Nation

By Chris Hayes

Analyzes the realities of racial inequality in the justice system that still exist in America, even after the ostensible successes of the civil rights movement in the 1960s. Contends that American criminal justice consists of two distinct systems: the Nation, where policing is practiced as expected in a democracy, and the Colony, where policing is practiced as one finds in an occupied land. Places police shootings and the ensuing protests in historical context with colonial America and its injustices that sparked the American Revolution. Asserts that mutual fear perpetuates separation between citizens of the Nation and the Colony. Discusses the possible models of a criminal justice system that considers not only victimization but also the costs of overly punitive policing and prosecution.
